

How to use a QR code

A QR code is a barcode system graphic which allows you to open files on your smart phone by scanning the pixelated graphic using your phone's camera.

All you need to do is open your camera and face your camera towards the graphic.

Once the QR code has been acknowledged by the device, a pop up banner will appear. You will need to click on this to open the digital June 2022 version of Pathfinder International magazine.

If this does not happen, please go to your settings and ensure you have Scan QR code available. To do this visit settings, then camera and slide the scan QR codes slider to green.

You can also take a picture of the QR code graphic on the postcard and open up the photo as you would normally do in pictures in the photos app. From there you can click the Live Text icon in the bottom corner of the screen. Text the QR code and the pop up banner should appear.
